

FICTIONAL DEMONSTRATION — PLACEHOLDER DOCUMENT.

This is where the full original lives

In a real case file built with the **case-file method**, this link serves the full-resolution original of the document you clicked — the letter, contract, determination, report, or record — hosted with the case file, one click from the claim it supports, labeled with its exhibit number.

Every document in this demo points here because the demo is fictional and contains no real records. See the repository's prompts to build the real thing from your own documents.
